

9th INTERNATIONAL LUNG CANCER NETWORK

WELCOME

Dear Colleagues and Friends,

We are excited to invite you to join us at the 9th ILCN taking place on site at Athens, Greece. This bi-annual international lung cancer meeting brings together some of the top lung cancer experts, from across the globe. Debates, State-of-the Art lectures, multidisciplinary sessions, and extended panel discussions encourage interaction with the faculty members and address ongoing clinical challenges and controversies. Participants will have the opportunity to understand the reasoning behind clinical trials, the interpretation of the results and their application in the clinical practice. Renowned lung cancer experts from the basic and clinical research, the academia and the industry will share their experiences and present early clinical data, ongoing clinical trials, innovative technologies, and strategies, in the effort to designate the current optimal care and shape the future of lung cancer management.

We hope you will join us on site for this very informative and timely meeting.
